

KEEP STUDENTS SAFE ONLINE AND ON CAMPUS

Increasingly sophisticated digital threats and increased violence on campus make it harder for institutions to protect students and staff

36% of universities are hit by a cyber attack every hour¹

In 2016, 78% of crimes against university students and faculty reported under the Clery Act occurred on campus²

Higher education accounts for 17% of all data breaches where personal information is stolen, second only to healthcare³

37% of higher education leaders say their institution's locks and doors are not properly configured for safety and security⁴

Smart and Secure Campus solutions empower higher education institutions to help protect students and faculty online and on campus

Help protect data from breaches and cybercrime

Leverage industry-leading security controls and intelligence to help protect against new and evolving cyber attacks

Help ensure your students are protected from identity theft and fraud

Establish defense in depth and remediation measures to enhance the protection of students' personally identifiable information

Maximize physical campus safety and accelerate emergency response times

Control building access with ease and quickly identify potential threats with faster emergency notification and response

Partner with an industry leader that provides comprehensive solutions with our partner ecosystem to meet all your physical and cybersecurity needs

Cybersecurity and data protection

Enhance the security of personally identifiable information, data, devices, applications, and infrastructure

Leverage advanced analytics to quickly identify abnormal activity and gain deeper insights into cyber attacks

Benefit from a team of over 3,500 cybersecurity experts and over \$1B invested a year in security

Physical campus safety and security

Automatically identify suspicious activity through real-time video analysis, while also addressing video security and privacy needs

Maximize safety and enhance communication during emergencies with mobile alerts and safety apps

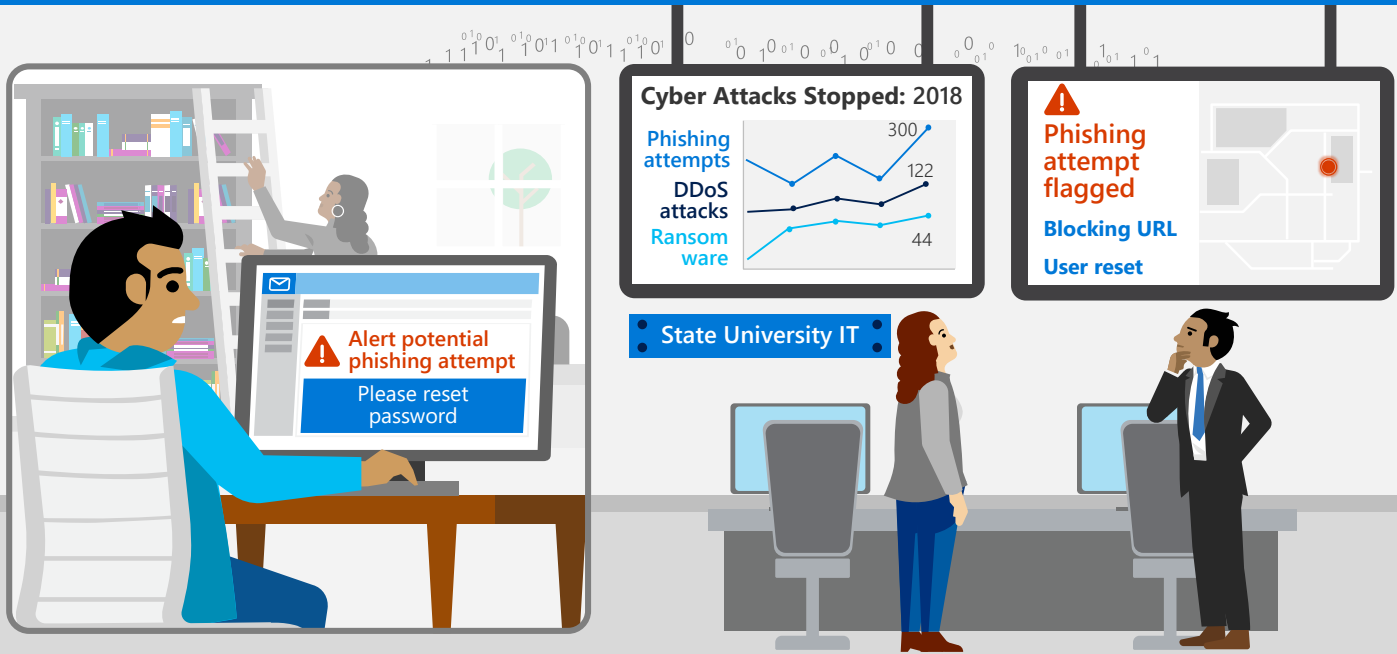

Ensure the right people have access to the right spaces at the right times using digital access control

HUB, *Higher Education – A Goldmine of Personal Data for Hackers*, 2017. 4. Campus Safety Magazine, *Campus Safety Access Control Survey*, 2017.

Maximize student safety and online security with the latest technology

Identify and remediate cyber threats that affect student and school data

Detect and prevent suspicious activity while instantly communicating incidents across campus

What leading institutions are saying

University of Puerto Rico

"The solution, built on Microsoft Azure, is ideal not just for schools, but for any organization that wants to keep its community members safe. The peace of mind it provides is priceless."

- Efraín Vázquez-Vera, Chancellor, University of Puerto Rico at Humacao

University of Southern Denmark

"Tools like Windows Defender ATP are so deeply integrated... that I have better analytics and detailed forensics to strengthen our overall security profile."

- Bo S. Dreier, IT Security Specialist, University of Southern Denmark

Industry leaders with deep experience in campus safety and security
